### Personal statement

Aspiring Mobile App Developer with expertise in Kotlin, Jetpack Compose, SwiftUI, Swift and React Native. Passionate about crafting innovative mobile applications, I bring a robust background in React Native, React, and full-stack development, including Node.js and Django. Proficient in API integration, AWS, and various databases, I am eager to leverage my skills in a full-time role to drive impactful mobile projects and contribute to cutting-edge solutions.

---

### Web development skills

May 2012

---

## Project portfolio

---

[Luneur Tarot](#)/ Malmö october 2024 [GitHub](#)

Kotlin, Jetpack Compose

Luneur Tarot is a modern tarot reading app built with Jetpack Compose, offering daily card readings and three-card spreads. It features reactive state management with ViewModel and StateFlow, and includes custom animations. The app provides a seamless user experience with navigation components and asynchronous operations handled via Coroutines.

[GissaFärger](#)/ Malmö january 2024 [GitHub](#)

Swift, Swift UI

GissaFärger is an entertaining game where the user develops his color knowledge by guessing RGB values using sliders. Exciting and educational, Guess the Color is the perfect game for exploring a colorful world.

[BeautyLens](#)/ Malmö october 2023

React Native, API, Expo

**BeautyLens** is a cosmetics catalog app designed for easy exploration and filtering of beauty products. The app allows users to search and filter cosmetics by various criteria such as brand and vegan status.

---
